

# Problem Set 4

## Presentation using LaTeX

Create a **beamer** presentation containing the results obtained in problem set 2 and 3 concerning the effects of monetary policy in the UK.

Your presentation needs to contain at least the following:

1. Title of the presentation
2. Outline of what is going to be presented.
3. Explanation why we cannot obtain the effect of monetary policy by regressing the changes in interest rate on, for example, output or inflation.
4. What is your identification strategy.
  - Regression
  - Description of the data you use
  - Plot of the identified shock series
5. Estimation of the dynamic causal effects.
  - Regression of the Local Projection
  - Description of the data you use
  - IRF Plots
6. Conclusion or summary of the results/.
